# PARENTAL CONTROL MENU/US V-CHIP

For the United States, the rating setting basically include the following options: Movie Rating, TV Rating.

## PARENTAL CONTROL MENU/ Movie Rating

**This system defines the rating controls which come from MPAA rules**

### Rating define

	General audience. All ages admitted.
PG-13	Parental guidance suggested. Some material may not be suitable for children.
R	Parents strongly cautioned. Some material may be inappropriate for children under 13.
NC-17	Restricted. Children under 17 require accompanying parent or adult guardian.
X	No one 17 and under admitted.
	Adult audience only.

PARENTAL CONTROL MENU/ TV Rating

The TV ratings compose of two aspects: age-based and content-based.

Age	Deane	Content	Define
TV-Y	General audience	FV	Fantasy violence
TV-Y7	Parental guidance suggested	D	Suggestive dialogue
TV-G	Parents strongly cautioned	L	Strong language
TV-PG	Retracted	S	Sexual situations
TV-14	No one 17 and under admitted	V	Violence
TV-MA	Adult audience only		

Note: The content ratings will increase depending on the level of the age-based rating. For Example, a program with a TV-PG V (violence) rating may contain moderate violence, while a TV-14 V (violence) rating may contain intense violence. So locking a higher level option will Automatically cause locking the options that has more sensitive level.

# PARENTAL CONTROL MENU/ Canada V-CHIP

For Canada, the rating settings include the following options: English Rating, French Rating.

## English Rating

These ratings are for programs which are using English rating system.

Rating	Defined as

# PC Mode

## Setting up your PC software (based on Windows XP)

The Windows display-settings for a typical computer are shown below. But the actual screen on Your PC will probably be deferent, depending upon your particular version of Windows and your Particular video card. But even if your actual screen looks deferent, the same, basic set-up Information will apply in almost all cases.

1. First, click on “Control Panel” on the Windows start menu.
2. When the control panel window appears, click on “Appearance and Themes” and a display Dialog-box will appear.
3. When the control panel window appears, click on “Display” and a display dialog-box will Appear.
4. Navigate to the “Setting” tab on the display dialog-box. The correct size setting (resolution) Optimum: 1360×768.

If a vertical-frequency option exists on your display settings dialog box, the correct value is “60Hz”. Otherwise, just click “Enter” and exit the dialog box.

Resolution	Horizontal Frequency (KHz)	Vertical Frequency (Hz)	Standard Mode
720x400	31.47	70	DOS
640x480	37.9	72	VGA
800x600	37.9	60	SVGA
1024x768	48.4	60	XVGA
1280x1024	64	60	SXVGA
1360x768	47.7	60	WXVGA+
